## **Hype vs Reality: Untangling Pros and Cons of the IOTA Tangle**

IOTA and Tangle are difficult concepts to wrap your head around at first glance. Especially when compared to a typical blockchain. However, the potential benefits offer a wealth of data for those willing to work their way through and stick with the technology.

# Unseen People: Facial Recognition Software's Problem with Bias

---

As facial recognition software becomes mainstream, a troubling problem is rearing its head — many heavily marketed AI technologies rely on inherently biased datasets. This causes facial recognition software to make more mistakes when trying to recognize women and people of color. [Click to learn more.](#)

IC-CAP

# The Quarterly Dive

Discover what's under the surface!

September 26, 2018

## Message from the CEO

The leadership of IC-CAP is focused on communication with our current and future members. It is important to ~~working~~ working together as a team and being successful. This is the main reason for starting this newsletter. We want this newsletter to support group collaboration and brainstorming to help solve problems, exchange ideas and come up with creative ways of doing things. IC-CAP has a diverse group of intelligent individuals with a vast amount of knowledge that we need to leverage to be successful. I look forward to working with everyone.

-Joni

## Notes from Leadership:

### Membership vs. Employment

IC-CAP takes pride in their relationship with their employees. Unlike larger companies, IC-CAP Leadership feels all staff are members of the company and tied into the ability of the company to grow while they grow.

IC-CAP is a partnership—it takes both billable and overhead staff to make sure everyone reaches their greatest potential!

### Contracts

IC-CAP had a great quarter. We currently have over 50 positions open for immediate staffing on DIA's ECND and the AF's SAP Security contracts.

We are anxiously awaiting award of the ISEO, ISEE, and CENTCOM J2 contracts which should be awarded in the coming weeks and should provide additional opportunity for growth.

## IC-CAP Employee of the Month

### Melissa Jarquin

Meet Melissa! She is a Geospatial and Imagery Analyst and has been with IC-CAP since August 2018. She is part of the NGA's deployment program and has been lucky enough to travel the world in support of the Warfighter. She returned from Djibouti in June and recently departed to go to Baghdad, Iraq. When stateside she works in St. Louis. In her free time she loves to read, run, and spend time with her two dogs.

Melissa loves being a part of a growing company like IC-CAP. As an employee, she appreciates knowing that she can get in contact with Steve and Joni and that they truly care about their employees. She's excited to see their growth and to be a part of it!
